

Nishant Raj

4.6 Years — Immediate Joiner — Java Backend Developer — Spring Boot — Microservices

New Delhi, India | +91-9311238361 | nishant.read@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Java Backend Engineer with 4+ years of experience designing scalable distributed systems using Java, Spring Boot, REST APIs, and Microservices. Experienced in building event-driven architectures, high-performance backend services, and cloud-native applications. Strong background in system design, SQL optimization, CI/CD pipelines, and production system reliability.

Technical Skills

Programming: Core Java (8/11/17/21), Multithreading, Collections, Streams, Executor Framework, Data Structures
Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, J2EE, REST APIs, JDBC, JPA, Hibernate, Swagger/OpenAPI
Architecture: Microservices, Distributed Systems, Event-Driven Architecture, System Design (HLD/LLD)
Databases: MS SQL Server, Oracle DB, MySQL, IBM DB2, SQL Query Optimization, Stored Procedures, Data Modeling
Batch & Data Processing: ETL Pipelines, Java Batch Applications
Cloud & DevOps: AWS (S3, EC2), Docker, Kubernetes (basic), Jenkins CI/CD, GCP Monitoring
Messaging: Apache Kafka, Message Queues
Tools: Git, Bitbucket, Maven, Jenkins, SonarQube, JIRA, Postman, IntelliJ
Operating Systems: Linux, Unix
Languages: Java, SQL, Python (basic)
Engineering Practices: OOP, SOLID Principles, Design Patterns, Agile (Scrum, Kanban), SDLC

Work Experience

Futops Technologies India Pvt Limited <i>Senior Software Engineer — Gurugram, India</i>	May 12, 2026 – Present
IndiGo (InterGlobe Aviation Ltd) Problem: Legacy airline integration workflows were slowing modernization efforts and increasing operational complexity. Action: Transformed C#-based business workflows into Java Camel services on OpenShift, combining domain analysis with AI-assisted code comprehension to accelerate migration and ensure functional parity. Business Impact: Delivered a cloud-ready integration platform with faster release cycles, improved maintainability, and reduced technical debt.	Java, Camel,
Tata Consultancy Services (TCS) <i>Java Backend Engineer — Noida, India</i>	Jan 2023 – May 1, 2026
Government e-Marketplace (GeM) - Developed scalable Spring Boot microservices powering India's public procurement platform handling 3+ lakh crore transactions. - Designed and implemented REST APIs and integrated with external systems. - Improved performance using JVM tuning, SQL optimization, and multithreading. - Built database-driven modules using JDBC, JPA/Hibernate, and optimized SQL queries. - Deployed backend services on AWS (EC2, S3) in a distributed architecture.	Java, Spring Boot, Kafka, Spring JPA, AWS
Walgreens Boots Alliance - Developed backend services supporting payment processing and transaction systems. - Improved production stability reducing downtime by 60%. - Increased automated test coverage using JUnit and integration testing. - Automated CI/CD pipelines using Jenkins and Docker.	Java, Hibernate, JPA
Carasoft - Implemented RBAC authentication and JWT security architecture. - Built event-driven microservices using Apache Kafka.	Spring Security, JWT
Tech Mahindra <i>Associate Software Engineer — Noida, India</i>	Aug 2021 – Sep 2022
Mountain Crew - Improved backend processing performance by 50% using multithreading and executor framework. - Optimized SQL queries and indexing improving database response time. - Built backend components interacting with DB2 and Oracle systems. - Reduced MTTR by 30% through log analysis and production debugging.	Java, DB2, MySQL, JDBC

Projects

Distributed Notification System - Designed a scalable event-driven notification platform supporting email and SMS notifications. - Implemented Kafka-based asynchronous processing to handle high message throughput. - Used Redis caching to reduce processing latency and improve performance.	Java, Spring Boot, Kafka, Redis
